KENWOOD

TS-990S

HF/50MHz Transceiver **TS-990S**

The TS-990S comes equipped with dual receivers for simultaneous reception on different bands, it also features narrow-band roofing filters on the main receiver in a full down-conversion configuration. The TS-990S achieves the highest basic reception performance of any radio in the TS series, through the careful selection of circuits, components and accelerating analysis using triple DSP configuration. Also, thanks to the dual TFT display and superior panel layout, it achieves both comfortable visibility and operability. Our top-of-the-line transceiver is for all radio operators who love HF.

Overwhelmingly the highest quality receiver in the TS series.

The dual receivers facilitate reception on different bands.

The main receiver is the highest quality receiver among the TS-900 series, thanks to its down-conversion configuration, newly adopted mixer, and five types of roofing filters. This highest quality transceiver will show its true mettle in contests, and fierce pile-ups even with high-intensity signals.

The TS-990S will surely satisfy any real DX'er.

An already legendary Subreceiver supports dual reception.

Two attractive features of simultaneous reception on different bands are that you can easily check the condition on other bands and still easily handle split-operation.

Innovation spurred by digital technology has revolutionized the KENWOOD sound.

Even after using narrow bandwidth filters for long periods of time, it is still easy to hear and less tiring to listen to. In addition to introducing AGC control using dedicated DSP, we have further refined the KENWOOD sound and reception sound quality transmitted by radio operators worldwide by innovating the analog AGC unit and installing numerous interference and noise elimination functions. Such innovations have given new life to KENWOOD's legendary sound.

Transmitter
performance,featuring
high-scale
specifications,can
withstand long periods of
operation at full power.

Operating stably even when continually working over long periods of time, such as in competitions.

Fitted with dual TFT displays for an intuitive situational awareness.

The combination of two displays, main and sub band, allows you to simultaneously monitor the target signal and the surrounding area with minimal eye movement.

Comfortable operational performance that you can

control at will.

The panel layout, familiar to KENWOOD users, allows for intuitive operation.

It's sure to win you over, increasing the accuracy of your operations and allowing you to develop greater familiarity with the equipment.
