

TEST AND MEASUREMENT

**Universal Wireless Test Set
MT8870A**

Description

Universal Wireless Test Set MT8870A

- Designed for high volume smartphones, tablets and wireless modules manufacturing test applications
- Supports WLAN, cellular, *Bluetooth*, and other connectivity wireless applications
- 4 high performance modules in one small chassis
- Supports simultaneous measurement of multiple wireless standards
- One license enables the associated capabilities on all installed modules

TRX Test Module MU887000A/MU887001A

- Built-in signal generator and signal analyzer
- 160 MHz wide measurement bandwidth
- Wide frequency range from 10 MHz to 6 GHz
- One module supporting multiple wireless standards
Supported standards: 5G NR sub-6GHz **NEW**,
LTE/LTE-Advanced, NB-IoT, Cat-M, W-CDMA/HSPA, TD-SCDMA,
GSM/EDGE, CDAM2000/1xEV-DO,
WLAN 802.11a/b/g/n/p(V2X)/ac/ax, Bluetooth v5.0, ZigBee, Z-Wave,
FM/RDS, GPS/Galileo/GLONASS/BeiDou, DVB-H, ISDB-T/ISDB-Tmm
- Built-in audio analyzer/audio generator
